Fairfield Department of Health

ACCREDITATION SITE REVIEW COMPLETED!

The Fairfield Department of Health (FDH) recently completed its Accreditation Site Review by the Public Health Accreditation Board (PHAB). The FDH employees have been working towards this for over three years. It has been a tremendous accomplishment for the employees of the health department to reach this point and have the site visit.

All employees of the health department assisted with this process. The Accreditation team took the lead and attended the site review representing the health department through that process.

Next Steps: The site visit review team has two weeks to submit their report to the PHAB board. The PHAB board will decide on March 21st (accreditation or an action plan). If we get an action plan, we will have 90 days to submit the plan and then a year to implement the plan.
