

Mosquitoes carry viruses and can make you sick....

FIGHT THE BITE...

Control mosquitoes around your home. Keep mosquitoes out of your home. Protect yourself.

Protect yourself and your family from mosquito bites:

Control mosquitos around your home.

Once a week, empty and scrub, turn over, cover or throw out any items that hold water, like tires, buckets, planters and bird baths. Don't forget the gutters on your house.

Keep mosquitos out of your home.

Keep windows and doors shut and use air conditioning when possible. Use, install or repair window and door screens.

Protect yourself.

If you are planning to be outside, use an EPA-registered insect repellent. Avoid outside when mosquitos are most active: dawn and dusk.
