Fairfield Department of Health continues to monitor the COVID-19 (Coronavirus) situation as it progresses. We are in communication with our local partners and Ohio Department of Health. The risk to the general public is low and there are no confirmed cases in Ohio at this time. Please know that public health is usually working behind the scenes to prepare for situations like this, but we stand ready. FDH would like to attach the a COVID-19 prevention sheet that ODH has provided.
