## HOMEOWNER PERMIT PROCESS

Submit completed plumbing permit application.

Submit two (2) sets of floor plans with isometric drawing.  
(floor plans of basement and each floor on standard size paper is best)

- isometric drawing of drain, waste and vent system
  - >isometric drawing can be on the back of the permit application
  - >isometric drawing can be on the plans or on a separate piece of paper
  - >isometric drawing can be done by homeowner, plumber, architect or engineer

Submit permit fee according to fee schedule.

---

Plans will be reviewed and approved, disapproved or approved as noted on plans or isometric drawing.

Approved plans - one set is retained by the Fairfield Department of Health  
- one set of plans and a copy of the permit will be for the homeowner

\* homeowner's plans are for the homeowner to have on the job site  
for inspections

- >keep plans protected and easily accessible
- >keep a copy of the permit posted on the job site

Disapproved plans – plumbing inspector will call the applicant
