Fairfield Department of Health

Fairfield Department of Health receives OEPA Mosquito Control Grant 2018-2019

Fairfield Department of Health applied for the 2018-2019 Ohio Environmental Protection Agency (OEPA) Mosquito Control Grant. The department received \$21,320 in funding for the grant period. With this funding Fairfield Department of Health will hire a temporary seasonal technician to collect mosquito samples, provide education about how people can protect themselves from mosquito bites and help residents eliminate breeding sites on their property. This is a great service to our community, it's unfortunate but without this funding, this service would likely not occur.
