APPLICATION INSTRUCTIONS

- 1. This is a two part form: APPLICATION and SITE PLAN
- 2. The form may be completed:
 - a. By computer, then printing; or
 - b. By printing the blank document, and filling all information with a typewriter or pen;
- 3. Contact the Local Health Department for the following information:
 - a. Fee information:
 - Site Plan completion information (some local health districts require staff to complete site plans);
 - c. Rule information.
 - d. Registered private water system contractor information.
 - i. A complete list of registered private water system contractors is available on the Ohio Department of Health website at https://odh.ohio.gov/wps/portal/gov/odh/know-our-programs/private-water-systems-program/info-for-homeowners/.
- 4. The applicant must sign and date the application prior to submitting to the Local Health District.
- 5. The applicable <u>FEES</u> must accompany all applications when submitting to the Local Health District. Applications will not be processed until all fees have been received by the Local Health District.
- 6. The Local Health District will review the application and site plan and notify you as to the application's status.
- 7. Contact the Local Health District if you do not receive information about the application status within fifteen (15) business days of submitting the application.

-Clearly indicate the location of all proposed and existing private water systemsClearly indicate all possible sources of contamination from the list to the right, including but not limited to the house, the sewage system and the drivewayClearly indicate the north direction, property lines, roads and road intersections. The following chart provides the minimum isolation distance requirements established in Ohio Administrative Code (OAC) 3701-28-07 for private water systems. Refer to http://codes.ohio.gov/oac/3701-28-07v1, for the complete isolation distance rule language in OAC 3701-28-07.

This chart is provided as a courtesy and is not required to be submitted with the application and site plan.

Isolation Distance Requirements as per OAC 3701-28-07

Potential Source of Contamination		<u>Minir</u>	<u>num</u>
If the potential source of contamination is not listed below		50	ft
Dwelling or building foundation		10	ft
Deck or porch, not part of the building foundation for basement or crawl space		5	ft
Road right-of-way		10	ft
	25 ft - only if this isolation distance separation distance than the road u		
Road utility easement, when no right-of-way is designated	10 ft - only if this isolation distance separation distance than the norma	gives a	greater
Driveway or parking lot (edge of)		5	ft
Lot lines / Easements		10	ft
Watertight sewers and drains (more than five feet from outside the building founda	tion)	10	ft
Sewage treatment system (STS)		50	ft
Gray water recycling system (GWRS) components		50	ft
Leaching pits (not properly abandoned)		100	ft
Dry wells (not properly abandoned)		100	ft
Watertight vault privies		50	ft
Leaching privies		100	ft
Wastewater treatment plant		300	ft
Drainage wells		100	ft
Properly sealed wells		5	ft
Private water system well (constructed properly)		10	ft
Public water system well (constructed properly)	outside the sanitary isolation radi water well – OAC 3	us of the	e public
Water wells or boreholes of unknown or unregulated unpermitted construction		50	ft
Vertical open loop geothermal system, sealed with grout materials		25	ft
Horizontal or vertical closed loop geothermal system, utilizing propylene glycol		25	ft
Horizontal or vertical closed loop direct exchange geothermal system with circulating	ng refrigerant or a heat transfer		
antifreeze other than propylene glycol		50	ft
Horizontal or vertical geothermal system of unknown or undocumented construction	n	50	ft
Streams, lakes, ponds and other permanent bodies of water		25	ft
Storm water structure / special conduits / ditches with intermittent water flow		15	ft
Bulk salt storage piles		100	ft
Fuel operated motors used for well pumps without secondary containment		50	ft
Fuel oil, diesel, chemical, or gasoline storage tanks or other petroleum liquids (less		50	ft
Fuel oil, diesel, chemical or gasoline storage tanks or other petroleum liquids (great	ater than 1,100 gallons without		
secondary containment)		300	ft
Natural gas or propane (LP/liquid propane) home heating tanks above or below groups	ound	20	ft
Oil and gas wells or the oil and gas well pad		100	ft
Municipal solid waste, residential waste, industrial waste, and Class I, II, III solid waste,	-	1000	ft
Construction and demolition debris solid waste facility and Class IV solid waste con	mposting facilities	500	ft
A regional storage facility or other bulk storage facility for biosolids (sludge)		300	ft
Grass pasture with large animals (with barrier around well component)		5	ft
Animal waste management facility located at major, large, or medium concentrated	- , , ,	300	ft
Animal waste management facility located at an AFF <u>not</u> designated concentration		150	ft
Animal housing or holding pens with no grass cover, stables, manure piles, fabrica waste or treatment buildings not located at an AFF	-	50	ft
Land application of septage waste, manure, or biosolids (sludge) stockpile, storage EPA has determined the aquifer has a high susceptibility to contamination		300	ft
Surface land application area for septage, biosolids (sludge), commercially land apmaterials previously approved by Ohio EPA or the board of health	oplied manure, or other similar	200	ft
Subsurface incorporation application area using septage, biosolids (sludge), commother similar materials previously approved by the Ohio EPA or the board of health		100	ft
Storage or preparation area for commercial application of fertilizers or pesticides		150	ft
